Part III DETAILED ACTION

Claims 1-21 are currently pending.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

 Claims 1-9, drawn to first method of predicting secondary structure of a protein, classified in class 702, subclass 19.

II. Claims 10-14, drawn to second method of predicting secondary structure of a protein, classified in class 702, subclass 19.

III. Claims 15-21, drawn to computer-readable medium, classified in class 369, subclass 172.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as independent and/or patentably distinct methods which have different modes of operation and different method steps. A reference teaching one method (e.g. teaching superimposition of secondary structure on set of

Serial Number: 09/966024 Page 3

Art Unit: 1631

topomers) will not necessarily teach the steps of the other method (e.g., generation

of 3-D structure, "smart moves", etc).

The computer-readable medium of Group III can contain any type of information,

other than the obtained by method I or II. Further, the structure information is non-

functional descriptive material which does not bring distinguishing characteristics to

the medium of Group III.

Because these inventions are distinct for the reasons given above and have

acquired a separate status in the art because of their recognized divergent subject

matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must

include an election of the invention to be examined even though the requirement be

traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected

invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim

Serial Number: 09/966024 Page 4

Art Unit: 1631

remaining in the application. Any amendment of inventorship must be accompanied

by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37

CFR 1.17(h).

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Michael Borin whose telephone number is (703)

305-4506. Dr. Borin can normally be reached between the hours of 8:30 A.M. to

5:00 P.M. EST Monday to Friday. If attempts to reach the examiner by telephone are

unsuccessful, the examiner's supervisor Mr. Michael Woodward, can be reached at

(703) 308-4028. The fax telephone number for this group is (703) 305-3014.

Any inquiry of a general nature or relating the status of this application should

be directed to the Group receptionist whose telephone number is (703) 308-0196.

September 23, 2003

MICHAEL BORIN, PH.D. PRIMARY EXAMINER
